

**ARU** Aircraft Refuelling Unit  
BASED ON PreciCONTROL TECHNOLOGY

**ONE STANDARD - FULLY SCALABLE - UNCHANGED INTERFACES**

**Aircraft Refuelling Unit  
in modular design**

Short  
Delivery  
time

**FEATURES**

- MID approved PreciFUEL metering system
- Venturi control
- Automatic flow rate based differential pressure monitoring
- FWS with Velcon elements
- Sampling Jar with LED illumination
- Water sensor in filter sump
- Recovery tank with integrated fill level display
- Automatic draining of recovery tank
- LED illumination
- Up to two hose reels and deck hoses
- PTO and Engine control
- Bonding reel with spring motor
- ATEX, ADR, JIG and DIN EN 12312-5

**OPTIONS**

- Defuelling with integrated cross over safe defuelling valve
- Integrated vane pump installed in module
- Inline control with operator adjustable pressure and/or flow rate
- Large Overhead Display
- Automatic draining of FWS sump
- FSII injection
- Printer
- Choice of FWS elements
- Self-loading

AVAILABLE CONFIGURATIONS	SMALL 600L/MIN	MEDIUM 1200L/MIN	LARGE 2400L/MIN
